

Mathis Consulting Company is working with the South Carolina Energy Office to provide energy code training to building code officials, builders, mechanical and general contractors, realtors, design professionals, HVAC professionals and others throughout the State.

This effort is geared towards increasing energy code compliance through an understanding of the South Carolina Energy Conservation Code as well as a wide variety of topics related to building science, building performance and the importance of energy efficiency.

We are seeking opportunities to conduct trainings for anyone involved in the building industry in South Carolina. Trainings can be tailored to meet an individual group or jurisdiction's needs. Potential training topics include but are not limited to:

- SC Energy Conservation code Residential/Commercial prescriptive requirements:
 - Air sealing
 - Insulation
 - Fenestration
 - Mechanical /HVAC
 - Lighting and Electrical
- SC Energy Conservation code Residential/Commercial performance path
- REScheck
- COMcheck
- Manual J, D, and S
- System balancing
- The power of energy efficiency
- Duct installation, sealing, and insulation
- Ensuring compliance: Best practices for building inspectors and builders
- Common code compliance problem areas
- Making improved energy codes work for you: Marketing energy efficiency
- Plans review

Educational materials as well as compliance tools will be available at each training. Continuing education units will also be available at select trainings.

If your association, department or jurisdiction is interested in having energy code training conducted, please contact Joan Walker with Mathis Consulting Company at 828-450-8128 or joan@mathisconsulting.com.
